Education

Amrita Vishwa Vidyapeetham, Chennai: B.Tech. in CSE Artificial Intelligence, 2021-2025 | *CGPA: 8.99* | [Link to all courses](#)

Cloud & Data Engineering: GCP (BigQuery, Dataproc, Bigtable, Composer/Airflow), AWS, Databricks (Delta Lake, Unity Catalog, Workflows), Apache Spark (PySpark, Scala), DAG Orchestration, ETL/ELT Pipelines, Medallion Architecture, Data Warehousing, Automated Data Validation.

Programming & Tools: Advanced SQL, Python, Scala, Java, Git/GitHub Actions, Maven, IntelliJ.

AI & Machine Learning: ML, DL, RL, LLMs, RAG, Vector Databases, Prompt/Context Engineering, CNN, NLP, PyTorch, Keras, scikit-learn, Rasa Framework.

Experience

Data Engineer → Team Lead – Cloud Replatforming, American Express (Accenture) Apr 2026 - Present

Skills: *GCP, BigQuery, Dataproc, Composer/Airflow, Spark (Scala), Bigtable, Hive, Maven*

- Promoted to Team Lead within 2 months of joining – on my first project post-training – now owning delivery for the workstream.
- Migrating end-to-end use cases and production pipelines from an on-prem enterprise data warehouse to GCP; re-engineering legacy Hive/Spark (Scala) workloads onto Dataproc and BigQuery, and rebuilding orchestration as Composer (Airflow) DAGs.
- Built automated data validation reconciling row-level and aggregate parity between on-prem and cloud across dev/test/prod, certifying migrated tables before cutover.

Data Engineering Trainee – Databricks Stream (Accenture) Oct 2025 - Jan 2026

Skills: *AWS, Databricks, PySpark, SQL, Delta Lake, Orchestration*

- Automated scalable ETL pipelines using AWS compute/storage, PySpark DataFrames, and Delta Lake, reducing daily data processing time by 35%.
- Orchestrated pipeline execution and Git-based version control workflows, achieving 99.9% production reliability and decreasing deployment errors by 25%.

AEH Intern at Accenture Jun 2024 - July 2024

Skills: *AI, ML, Gen AI, Rasa Framework, Python, NLP*

- Completed an intensive 180+ hour training program covering Generative AI, Machine Learning, and Automation, scoring in the top 5% of cohort technical assessments.
- Engineered an intelligent virtual agent using the Rasa Framework for internal onboarding, reducing HR ticket resolution time by 40%.

Artificial Neural Networks Internship Feb 2023 - May 2023

Skills: *Machine Learning Algorithms, PyTorch, CNN, Keras, Pandas, Python*

- Designed and optimized predictive neural network models using Python and PyTorch, improving baseline classification accuracy by 15% across 3 distinct datasets.

Projects

DineDash Food Delivery Analytics Platform Dec 2025 - Jan 2026

End-to-End Big Data Pipeline *Databricks, PySpark, DLT, Advanced SQL*

- Architected an automated big data pipeline using the Medallion Architecture on Databricks, processing streaming JSON and CSV data daily via Auto Loader with sub-minute latency.
- Engineered Delta Live Tables (DLT) using SQL and PySpark to enforce declarative data quality constraints, quarantining 24% of invalid records and normalizing 10+ complex nested structures.
- Automated pipeline execution and dashboard refreshes using Databricks Workflows, supporting daily actionable analytics with zero manual intervention.

Julie Feb 2024 - Apr 2024

Conversational Speech-to-Speech Agent for Mining Industries *LLM, OpenVoice, Whisper, RAG, Python*

- Engineered a conversational AI ("Julie") using OpenVoice, Whisper ASR, and a local LLM, reducing emergency communication latency in simulated mining operations by 30%.
- Implemented Retrieval-Augmented Generation (RAG) to enhance response precision by 45%, providing accurate operational protocols to field teams and boosting safety compliance.

Achievements/Awards

Certifications

Databricks Certified Data Engineer Associate (Credential ID: 173817322)

Google Cloud Certified - Cloud Digital Leader (Credential ID: fa48ebc5754541fa91dbf3e69a6c9d13)

Anthropic Claude Certified Architect - Foundations (Credential ID: 57akigddvhtg)

Paper Publications

Tomato Disease Classification Using CNN - Springer

Comparative Evaluation of Large Language Models for Abstractive Summarization - IEEE

Enhancing Algorithmic Trading Strategies with Sentiment Analysis: A Reinforcement Learning Approach - IEEE
